# BALENDIN®

- The mixture of 24g/l Difeconazole and 24 g/l Fludioxonil both systemic and contact activity. Provides a protective, curative and preventive effect for fungal diseases.
- After spraying, it concentrates around the root and provides a long- term protection zone around the young seedling. In this way it prevent the diseases entering the plant
- Provides excellent product safety, shows outstanding effectiveness againts all soil- borne, root and crown rot at low usage rates.
- Half dose application is enough for dipping application.

Fast Rooting  
and  
Stress  
Management

Systemic  
and  
Contact  
Effect

Curative  
and  
Anti- Sporulant

High Efficiency  
and Quality

Transplanting

1 to 8  
Leaves

Flowering  
and  
Pollination

Fruit  
Formation

Harvest

Crop	Diseases	Rate	PHI
TOMATO (Greenhouse)	SOIL ORIGIN PATHOGENS ( <i>Fusarium spp.</i> , <i>Phytophthora spp.</i> , <i>Rhizoctonia spp.</i> )	200 ml/da Drip Irrigation	10 Day
