

PHENIKSUS[®]

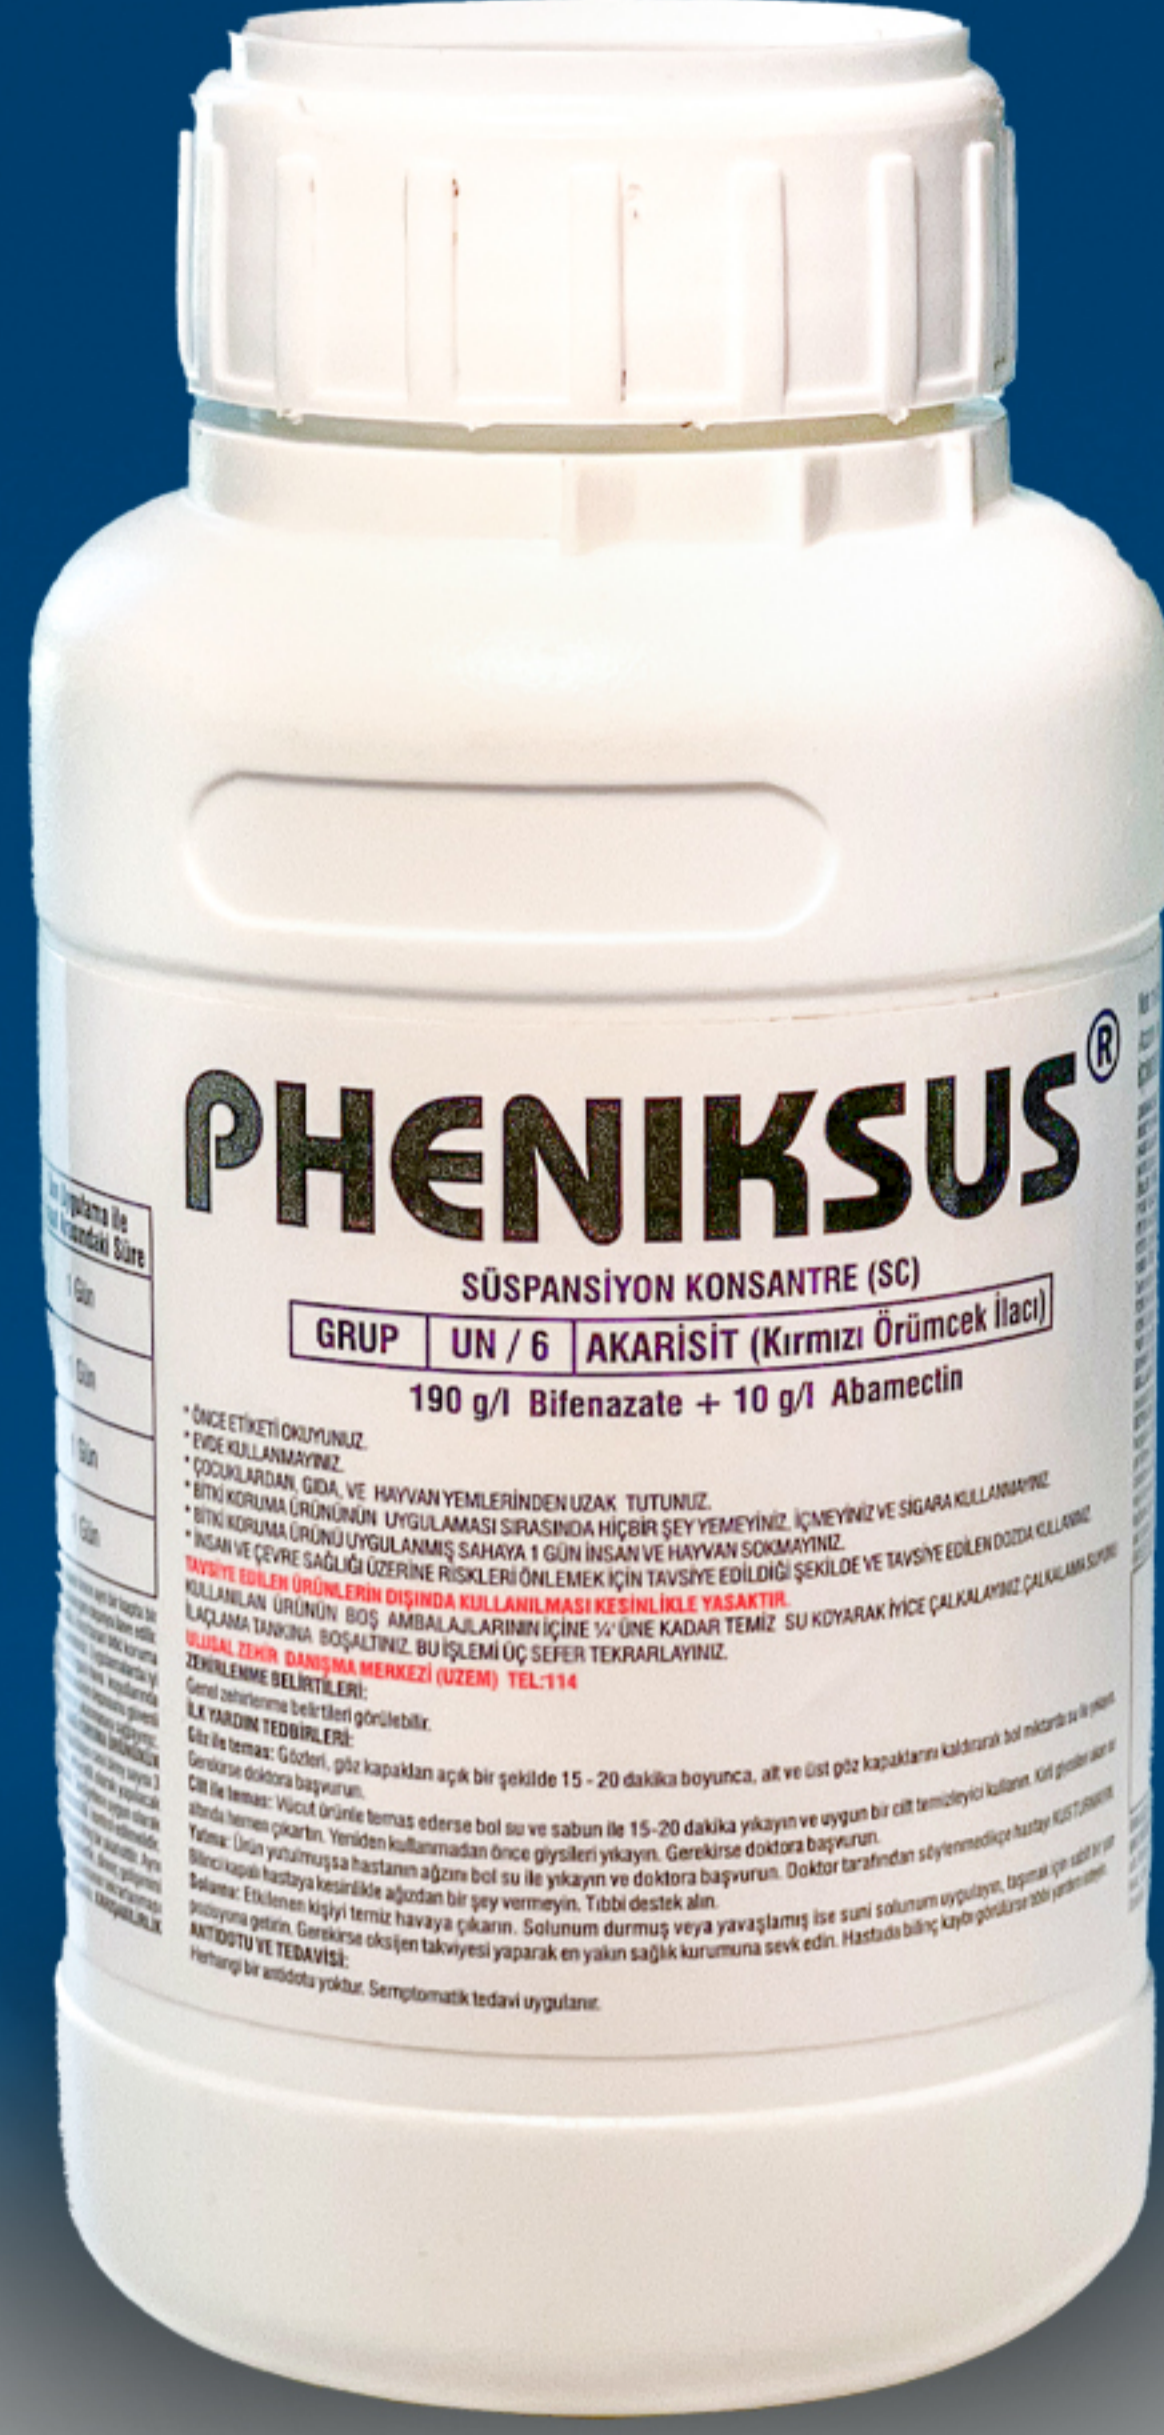

SAFE AND EFFECTIVE SOLUTION FOR MITES

ISB
Globe

PHENIKSUS®

Crop	Pest	Rate
Tomato (Greenhouse)	Mites (<i>Tetranychus spp.</i>)	50 ml/ 100 l water
Pepper (Greenhouse)	Mites (<i>Tetranychus spp.</i>)	50 ml/ 100 l water
Eggplant (Greenhouse)	Mites (<i>Tetranychus spp.</i>)	50 ml/ 100 l water

TRUSTWORTHY

This product, which is a mixture of two active substances effective on mites (190 g/l Bifenazate and 10 g/l Abamectin,) has a rapid and long lasting effect.

EFFECTIVE

-It has excellent effect on all development stages of mites.
-Bifenazate affects the nervous system and paralyzes mites.
Abamectin has a good contact effect.

SOLUTION

The effect of Pheniksus is not affected by environmental factors such as temperature, humidity and drought, and provides long-term protection. Spraying should be done when there are 3-5 adults per leaf. In higher populations, spraying should be repeated after 5-7 days .
